Benjamin Wozak

SOFTWARE ENGINEER

GitHub | **LinkedIn** | **Portfolio**

As a highly motivated software developer, I have over four years of experience designing and developing web applications for B2B SaaS products. I specialize in all things JavaScript to create elegant user experiences for complex software solutions.

EXPERIENCE

TEAM LEAD | FRONT-END ENGINEER | CHATA.AI
Sept 2019 – Present

Chata's flagship product AutoQL, uses Natural Language Processing to put complicated database query results in the hands of business users.

> Lead a team of four engineers in the design, development and maintenance of an internal web application used for configuring and training custom Machine Learning models.
> Designed and Developed two API management portals for interfacing with multiple SaaS solutions, a user portal, and an app extension for Microsoft teams in use by hundreds of users.
> Lead regular guild meetings with other front-end developers to discuss current technologies and set uniform standards that led to the company wide adoption of TypeScript.

WEB DEVELOPER | KRD CONSULTING
April 2019 – Dec 2019

KRD assists non-profit organizations in upgrading their strategy, research, and technology integrations.

> Re-developed a database management system using a modern tech stack. I supported a wide array of features including custom reporting and form creation tools.
> Designed and developed a network graphing visualization tool to help non-profits collaborate and connect with one another.
> Maintained a custom client site using DrupalCMS.
